

## Rubber/Cork Anti-Vibration Pad

### Models: LBRCP

### General Description

Rubber/Cork is used under equipment to dampen noise and vibration in floor caused by medium and high speed equipment.

- Applications: Air conditioning and refrigeration, pumps, piping, cooling towers, compressors, fans, generators or other high vibration machinery and equipment.
- Composition: Cork inner padding between corrugated elastomeric, oil resistant rubber padding.
- Durable: The rubber outer padding adds stability and resists oil, as well as being stackable.
- Non-skid: Ribs on both top and bottom of the pad to minimize slip
- Thickness: 7/8 inch
- Load capacity: 50 psi

Item No.	Rated Load (lbs.)	Dimensions L x W (in.)	Standard Pack	Weight (lbs.)
LBRCP-2	200	2x2	100	10.92
LBRCP-3	450	3x3	36	8.97
LBRCP-4	800	4x4	24	10.52
LBRCP-6	1800	6x6	12	12.06
LBRCP-12	7200	12x12	12	45.39
LBRCP-18	16200	18x18	6	51.04
