

Rubber/EVA Anti-Vibration Pad

Models: LBREP

General Description

Rubber/EVA Pad is one of the latest generation of vibration dampening solution. It shows greater performance than traditional solid rubber pad and “waffle” pad, and more durable than Rubber/Cork pad.

- Applications: Air conditioning and refrigeration, pumps, piping or other high vibration machinery and equipment.
- Composition: EVA inner padding between corrugated neoprene pads
- Durable: EVA material and neoprene are both oil-resistant.
- Non-skid: Ribs on both top and bottom of the pad to minimize slip
- Thickness: 7/8 inch
- Load capacity: 50 psi

Item No.	Rated Load (lbs.)	Dimensions L x W (in.)	Standard Pack	Weight (lbs.)
LBREP-2	200	2x2	100	9.79
LBREP-3	450	3x3	36	8
LBREP-4	800	4x4	24	9.63
LBREP-6	1800	6x6	12	10.76
LBREP-18	16200	18x18	6	46.45
