

## Insulated Copper Tube

### Models: LBICP

### General Description

- A complete line of insulated copper tube, pipes are protected by high grade flame retardant insulation for thermal resistance up to 120°C, suitable for any type of residential or commercial air conditioners.
- Pre-insulated pipes with flare fittings, easy installation and save time for installer.
- High quality copper tube in one-piece construction, eliminate the risk of gas leakage with less connecting parts.
- Linesets with paired pipes in different dimensions, fits air conditioning system in different capacity.
- Longer linesets will introduce greater flow-resistance, linesets should be as short as possible.

Part	Tube Size D	Capacity (BTU)
LBICP-23	1/4",3/8"	8000
LBICP-24	1/4",1/2"	16000
LBICP-35	3/8",5/8"	24000
LBICP-36	3/8",3/4"	32000
LBICP-46	1/2",3/4"	40000
